JavaScript (Basic)
PHP (Basic)

EXPERIENCE

UI/UX Designer @ Synerzip

December 2018 - June 2019

- Crafted digital experience for a Blockchain technology-based application for clinical trial management system.
- Validated various concepts and studied different user roles of the system and came up with a design strategy to solve complex UX challenges.
- Created multiple user flows and provided a consistent visual design for the same.

UI/UX Designer @ Webenza

September 2018 - November 2018

- Created UX proposals for the prospective clients by conducting UX Audits of the existing websites.
- Presented design solutions for the websites by creating detailed wireframes and visual designs as per the client's requirements.

UI/UX Designer @ Reliance Jio

June 2016 - August 2018

- Initiated the use of Material Design at Jio Media, single-handedly providing new MDL-based design concepts for the JioCinema mobile application.
Playstore Link: <http://bit.ly/2Argv19>
- Presented designs for revamped in-app navigation, receiving heavy praise for the same.
- Created iterative designs for multiple platforms and devices, including Android, iOS, Apple TV, Android TV, Chromecast, Web & VR.
- Worked closely with product stakeholders and developers to ensure continuous input from multiple perspectives and made corresponding modifications to the interface design.

UI/UX Design Intern @ Achieveee

June 2015

- Worked as part of a team to design a web portal for a travel website. Individually responsible for communicating with the client and writing corresponding user stories.
- Conducted research and created pixel-perfect design concepts with visual elements to match the client's requirements perfectly.
