EXPERIENCE

Hyland Software - UX Design Intern

June 2020 – December 2020 | Westlake, Ohio

- Researched and designed a proof of concept to set up a vision for a modernized, SaaS business process automation product.
- Facilitated collaborative ideation sessions with the stakeholders.
- Conceptualized and refined multiple iterations of the designs through periodic critique and feedback sessions with the other designers and stakeholders.

Synerzip - UI/UX Designer

December 2018 - June 2019 | Pune, India

- Crafted digital experience of a Blockchain technology-based application for managing clinical trials.
- Led the design of the admin module by validating various concepts, researching different user roles of the system, and providing a design strategy to solve complex UX challenges for the pilot launch of the product.
- Created multiple user flows, wireframes, and provided a consistent visual design.

Webenza - UI/UX Designer

September 2018 - November 2018 | Mumbai, India

- Created UX proposals for prospective clients by conducting UX Audits of the existing websites.
- Presented design solutions for the websites by creating detailed wireframes and visual designs as per the client's requirements.

Reliance Jio - UI/UX Designer

June 2016 - August 2018 | Mumbai, India

- Led the designs for revamped search and in-app navigation, which boosted content discovery and engagement for 2.3M monthly active users.
- Initiated the use of Material Design at Jio Media, single-handedly providing new MDL-based design concepts for the JioCinema mobile application.
Google Play Store link: <http://bit.ly/2Argv19>
- Delivered multiple iterations of cross-platform designs ranging from Android, iOS, Apple TV, Android TV, to Web & VR, while working in a cross-functional team of designers, developers, QA, and product owners.
